

Global Kinect Green Wedding Services

Philosophy

Every engaged couple wants their wedding day to be a special celebration that reflects who they are and what they care about. Going green is a great way to make the festivities unique and meaningful--and show friends and family just how fun, beautiful, and delicious a sustainable lifestyle can be. **Global Kinect** will help you plan the perfect wedding keeping you and the environment in mind.

Green Wedding Services

INVITATIONS

- Your wedding announcement or invitation can set the tone for your environmentally friendly wedding. There are many options today for 100% recycled, partially recycled or completely tree free papers from wedding invitation suppliers. Many brides today are communicating electronically to cut down on paper and waste.

FAVORS & CENTERPIECES

- The number of earth-friendly products and services is growing, giving the bride and groom a range of options. For instance, supporting a local artisan is much more earth friendly than having trinkets shipped half way around the world. Global Kinect can provide you with a variety of organic party favors to chose from.
- A great addition to the eco-friendly favors on the tables is to pull the "green" theme into your centerpieces. Table decor can take the form of small perennials that can later be planted by your guests. If you are looking for a vessel for the center of your table to hold sea shells or colorful rocks, consider vases made from recycled glass or a bamboo bowl, due to renewable tendencies.

Green Wedding Services

FLOWERS & DECOR

- Your wedding flowers can be a place where you can make conscientious decisions which can have big eco consequences. Many flowers sold are imported from developing countries where pesticide use is very high and labor conditions and wages are low.
- Global Kinect will help you find the perfect florist where organically grown, in-season, local flowers are the earth friendly choice. After the wedding, we can donate them to a local hospital or senior citizen center or send them home with your guests.

FOOD & WINE

- Global Kinect will help you create a delicious menu based around local, organic, and seasonal foods. Don't forget the organic wine, beer, and spirits, and the free-trade, shade-grown coffee and tea! We will also provide comprehensive recycling and composting facilities. All leftover food will be donated to a local food bank or homeless shelter.

Green Wedding Services

THE RING

- Many wedding rings are not very eco-friendly. There are eco-issues with diamond trade, no matter if it's "conflict free" or not (see below). There are also major problems that occur with gold mining. Global Kinect can provide you with a number of options for your beautiful green wedding or engagement ring.

THE DRESS

- For the bride, one of the most important wedding choices will be her wedding dress. No matter what your budget, the wedding gown industry is offering more and more conscientious fashion options.
- The easiest and most eco-friendly choice is to re-use a gown already worn. Buying vintage, renting, or wearing your mother's dress is a great way to be environmentally friendly and can be cost conscious, too.
- If having a new dress is important to you, consider earth friendly fabrics such as hemp, organic cotton, linen, and silk. Global Kinect works with an amazing eco wedding designer who can work with you to create the perfect custom gown.

Green Wedding Packages
